Can inshore Scottish creel vessels transition to using negatively buoyant rope?

In partnership with the RIFGs, The Scottish Entanglement Alliance (SEA) has been hosting workshops around the Scottish coast where creel fishermen have been finding out more about recent trials of negatively buoyant rope, sharing their views on how implementation could work in their area, and how they can trial negatively buoyant rope for themselves.

Upcoming workshops:

- Thursday 6th February – Fishermen’s Mission, Troon 6-8pm
- Wednesday 12th February - Dark Island Hotel, Benbecula 6-8pm
 - Thursday 13th February - Harris Hotel, Tarbert 6-8pm
 - Monday 17th February – Ullapool Village Hall 4-6pm
- Thursday 20th February – Fraserburgh (venue TBC) 4-7pm

All commercial creel fishermen welcome.

Please join us to share your views and experiences.
